PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student (CGPA 8.70/10, graduating May 2027) seeking a full-stack developer role. Built 3 full-stack applications with React, Node.js, Express.js, and MongoDB, including a live healthcare platform with 61 REST API endpoints. Wrote 335 automated tests across 2 projects and cleared Round 1 of TCS CodeVita.

EDUCATION

Vellore Institute of Technology – B.Tech, Computer Science & Engineering *Sept 2023 – May 2027*

CGPA: 8.70/10

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), SQL, C++

Frameworks & Libraries: React (18/19), Node.js, Express.js, Tailwind CSS, HTML5, CSS3

Backend & APIs: RESTful API Design, JWT Authentication

Databases: MongoDB, MySQL, PostgreSQL

Tools & DevOps: Git, GitHub, VS Code, Vercel, CI/CD Concepts

AI/LLM Integration: Google Gemini API, Ollama, GitHub Copilot

Soft Skills: Leadership, Communication, Collaboration, Planning & Coordination

PROJECTS

ReconAI – Verification-First AI Finance Controller Platform | GitHub *2026*

React, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, Razorpay API, Google Gemini

- **Built** an end-to-end platform that reconciles merchant orders, gateway payments, and settlement records with an **integer-paise deterministic engine**, achieving **100% classification accuracy** on a **120-scenario benchmark**.
- **Designed** an **autonomous 9-state AI agent** with multi-pass matching, confidence safety gates, and exception creation.
- **Integrated Razorpay Test Mode** (read-only, PII stripping, idempotent upserts) and **Google Gemini** for root-cause analysis.
- **Ensured** reliability with **181 automated backend tests across 42 files**, enforcing append-only audit trails and credential redaction.

HealthPulse – Full-Stack Healthcare Appointment & Clinical Platform | Live | GitHub *2026*

React 18, Node.js, Express.js, MongoDB, JWT, Google Gemini, Ollama

- **Architected** a **40,000+ line** full-stack platform with **61 REST API endpoints** across 9 modules and **13 MongoDB schemas**, using a controller-service-model architecture.
- **Eliminated** double-booking race conditions under concurrent load with a **compound partial unique index** and **TTL-based 5-minute slot holds**.
- **Secured** the platform with stateless JWT authentication, a `tokenVersion` mechanism for instant session revocation, role-based access control for 3 personas, and rate-limited endpoints.
- **Orchestrated** a dual-engine AI pipeline (Google Gemini + Ollama via `Promise.allSettled`) in non-blocking backend workflows, backed by **154 automated tests (471 assertions)** and a **98/100** Lighthouse score.

VibeChat – Real-Time Full-Stack Messaging Platform | GitHub *2026*

React 19, Tailwind v4, Node.js, MongoDB, Socket.io

- **Engineered** a real-time messaging application with **sub-100ms** message distribution over custom Socket.io channels.
- **Optimized** database queries by replacing N+1 queries with a **6-stage MongoDB aggregation pipeline**.
- **Containerized** a **1.17MB** production bundle with Vite 8 and Docker, adding OAuth session gates and lazy loading.

LEADERSHIP

Co-Lead (Social Media) – Linpack Club, Vellore Institute of Technology *Sept 2024 – Feb 2026*

- **Directed** social media strategy and content planning for the club, driving a **30%** increase in event registrations through targeted digital campaigns.
- **Co-organized** MatLabVerse, coordinating promotion, scheduling, and communication across peer teams.

ACHIEVEMENTS & CERTIFICATIONS

- **National Qualifier** – Cleared Round 1 of **TCS CodeVita Season 13**, a national-level competitive coding challenge.
- **Microsoft Certified: Azure AI Cloud Developer Associate** (Score: 922/1000)
- **Microsoft Certified: Azure Data Fundamentals** (Score: 955/1000)
- **MERN Full Stack Certification** – Ethnus & Codemithra
